Definitions for Information:

The communication or reception of knowledge or intelligence

Knowledge obtained from investigation, study, or instruction (2) : intelligence, news (3) : facts, data

A signal or character (as in a communication system or computer) representing data (2) : something (as a message, experimental data, or a picture) which justifies change in a construct (as a plan or theory) that represents physical or mental experience or another construct

Data that is (1) accurate and timely, (2) specific and organized for a purpose, (3) presented within a context that gives it meaning and relevance, and (4) can lead to an increase in understanding and decrease in uncertainty.
