

# Quantencomputer in der Gegenwart: der aktuelle Stand der Forschung

Prof. Dr. Wolfgang Wernsdorfer

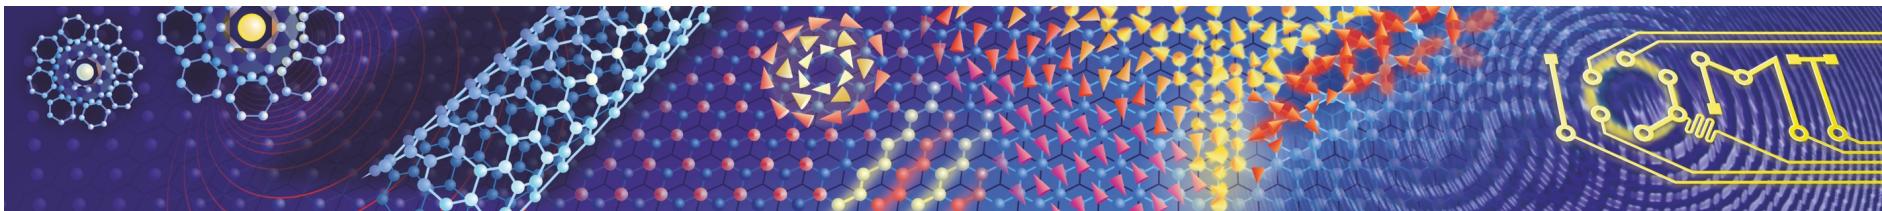

Institute of Quantum Materials and Technologies (IQMT)

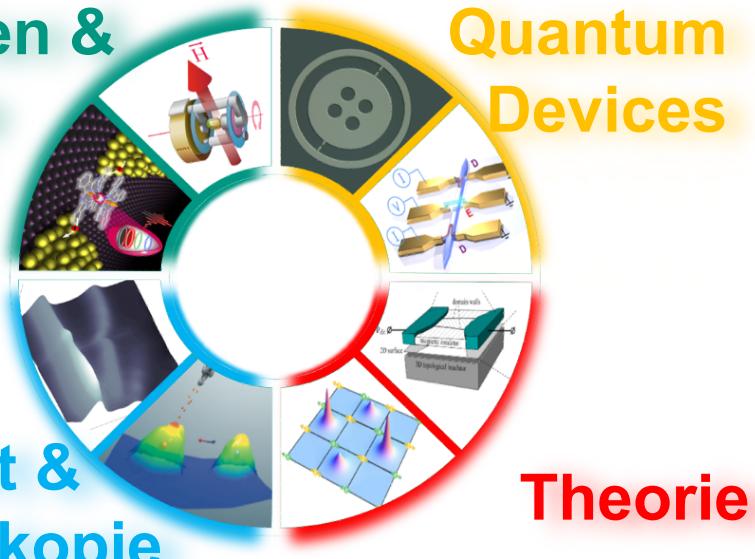

RESEARCH FOR  
GRAND CHALLENGES

[www.helmholtz.de](http://www.helmholtz.de)

HELMHOLTZ  
VON DATEN ZU WISSEN

Materialien &  
Moleküle

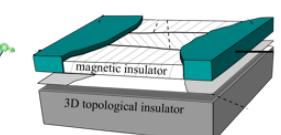

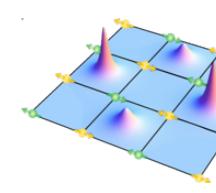

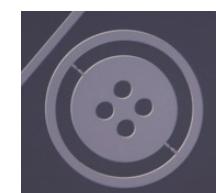

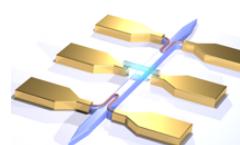

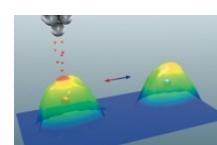

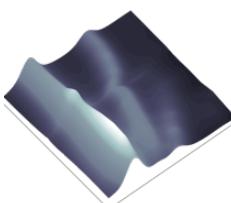

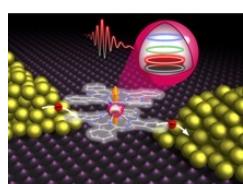

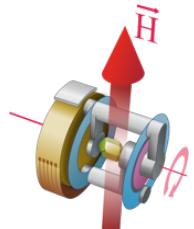

Transport &  
Spektroskopie

- Gründung 01/2020
- Entwicklung neuer Quantenmaterialien
- Funktionalisierung
- Bausteine für Quantentechnologien und Quantencomputer
- 8 Abteilungen, 17 Professoren

2022: ca. 110 Mitarbeiter (45 Dauerstelle)  
Personalbudget ca. 7M€/a  
(80% HGF, 20% Drittmittel)

# The whole world is quantum

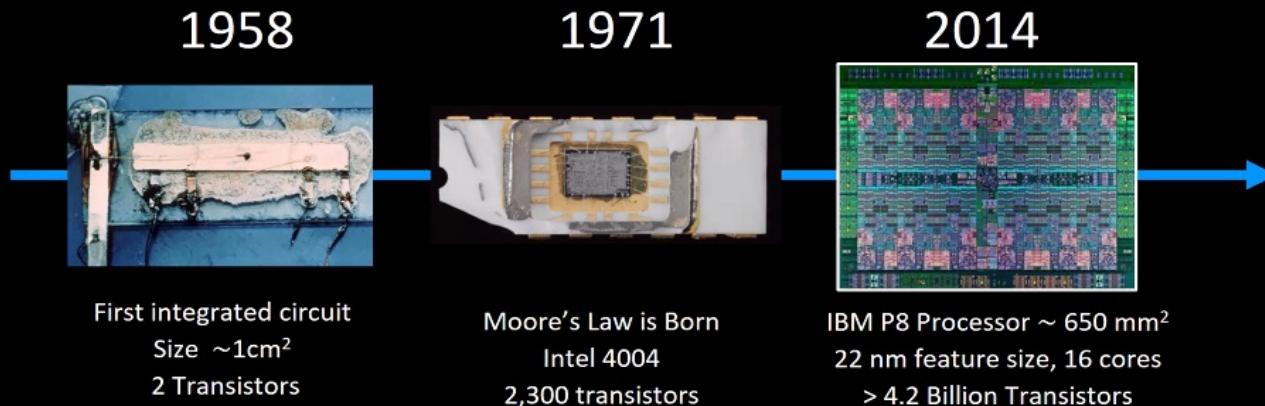

**Richard Feynman**

Is it possible to build computers that use the laws of quantum mechanics to compute?

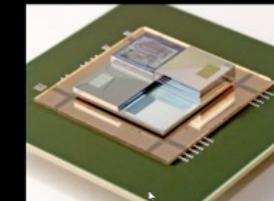

“Nature isn't classical, dammit, and if you want to make a simulation of nature, you'd better make it quantum mechanical, and by golly it's a wonderful problem, because it doesn't look so easy.”

Simulating physics with computers,  
R. Feynman,  
Int. J. Theor. Phys., 21, 467 (1982)

# Why Quantum Computing? Why now?

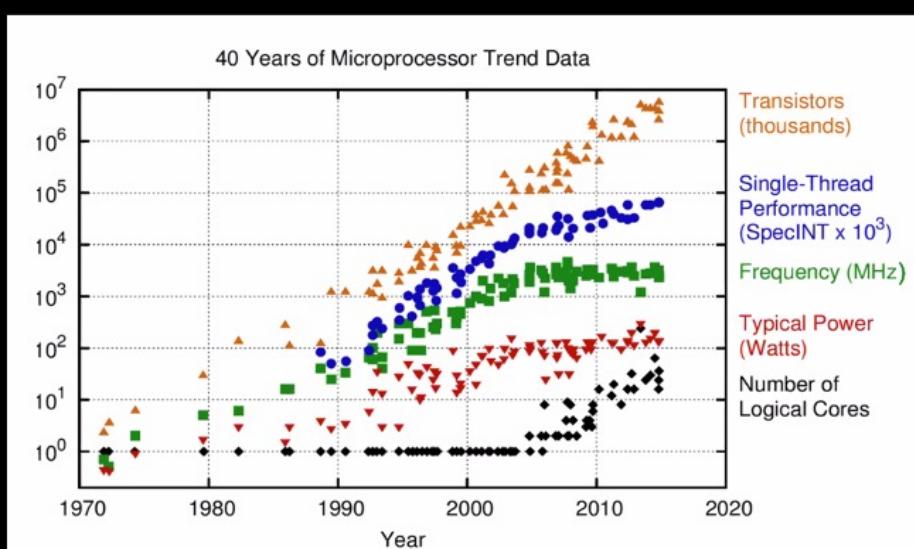

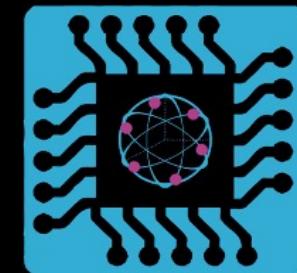

Alternative (co-existing) architectures:  
next generation systems (e.g. 3D)

neuromorphic (cognitive)

quantum computing

# Quantum Computing as a path to solve intractable problems

*Many problems in business and science are too complex for classical computing systems*

## “hard” / intractable problems:

(exponentially increasing resources with problem size)

- **Algebraic algorithms** (e.g. factoring, systems of equations)  
for machine learning, cryptography,...
- **Combinatorial optimization** (traveling salesman,  
optimizing business processes, risk analysis,...)
- **Simulating quantum mechanics** (chemistry, material science,...)

Material,  
Chemistry

Machine  
Learning

Optimization

# The Quantum Advantage – Storing quantum states

How much **memory** is needed to store a quantum state?

# qubits/	quantum state	coefficients	# bytes
1	$a 0\rangle + b 1\rangle$	$2^1 = 2$	16 Bytes
2	$a 00\rangle + b 01\rangle + c 10\rangle + d 11\rangle$	$2^2 = 4$	32 Bytes
8		$2^8 = 256$	2kB
16	...	$2^{16} = 65'536$	512 kB
32	...	~4 billion	32 GB
64	...	~ information in internet	128 EB (134 million GB)
256	...	~ # of atoms in universe	...

# RESEARCHING THE SECOND QUANTUM REVOLUTION

Quantum technologies in the Helmholtz Association

## **Umsetzung der PoF IV am KIT** **P2 NACIP – Quantum**

- Strong participation to the Helmholtz Roadmap for Quantum Technologies
- Intensive response to the many BMBF quantum calls (next slide)
- NFDI project DAPHNE
- Approval of the new GradUP “KIT Graduate School on Quantum Matter” (Coord. Prof. M. Garst)
- New Nanomat Focus Group (exchange platform with industry) „Quantum Materials and Technologies“

<https://www.helmholtz.de/forschung/quantentechnologie/computing/>

BMBF Call	Project	Partners	Budget (Total)	Budget (KIT)	Status
Schluesselkomponenten für QT	PtQube (2020-2023)	KIT, TransMIT GmbH Entropy GmbH	1.4M€	0.9k€	Started
Quantenprozessoren und Technologien für QC	GeQCOS (2021-2025)	WMI, IAF, Infineon, KIT, FAU, FZJ	16.1M€	3.2M€	Started
Selbstbestimmt in der digitalen Welt	QR.X (2021-2024)	KIT + ca. 30 weitere deutsche Partner	35M€	1.2M€	Started (1.8.21)
Quantum Computing Demonstrators	Spining	KIT + ca. 30 German Partners	36.5M€	1M€	Expected (10-20% cut) 1.1.22
	Qsolid	KIT + ca. 40 German Partners	~70M€	5.7 M€	Final decision exp. 12/21
Grand Challenge der Quantenkommunikation	NEQSIS	PIs: Hunger + 2 German Partners	1.05M€	350 k€	Begin exp. 1.11.21
Enabling Technologies für die QT	qBriqs	KIT, IAF, PTB + Rosenberger, Stahl	1.9 M€	450 k€	Begin exp. 1.11.21
Nachwuchswettbewerb Quantum Future Runde 2	DiamondNanoN MR	KIT	3.9 M€	3.9 M€	Step 2 in preparation

# **Umsetzung der PoF IV am KIT**

## **P2 NACIP - Quantum**

- Pending recruitments:
  - T1/T2: New UB professorships get affiliation with IQMT and positions
    - W3 Quantum Computing (Fiebiger Professorship)
    - W3 Quantum Optics (NF Kalt)
    - W3 Quantum Circuits (professorship in Stuttgart)
    - W1 TT-Prof. for Quantum control of spins on surfaces
- YigPrepPro:
  - 2021 Dr. Mehdi Frachet (T1)  
*Holistic investigation of quantum materials under uniaxial strain*
  - 2021 Dr. Eider Berganza (T1)  
*Artificial Spin Ice systems*

# QUSTEC COFUND

A first-of-its-kind, international P...  
program in quantum science and  
technology (QST)  
for 39 doctoral researchers across 3  
countries 2020-2024

- Strong QST Player in the Upper-Rhine Region
- Educating the Quantum Engineer at
  - University of Basel
  - University of Freiburg
  - Karlsruhe Institute of Technology
  - University of Strasbourg
  - Industry: IBM Zurich

- ✓ Theory / experiments
- ✓ Solid state / Quantum optics
- ✓ Quantum dynamics
- ✓ Quantum technologies
- ✓ Quantum computing

First H2020 project to be approved to a European Grouping of Territorial Cooperation (EUCOR)

# DFG Cluster of Excellence proposal: Self-organized functional quantum systems

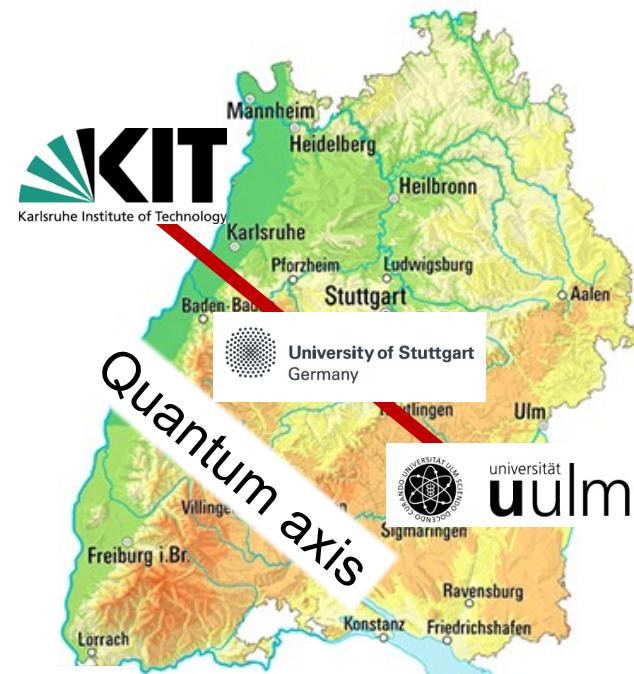

## Joint effort with Stuttgart and Ulm

- large number of joint QT projects ongoing
- previous interaction on SFB
- strong & complementary thematic fit

**Central idea:** Bottom up, self-organized quantum systems for quantum technologies

- **Area 1:** Self-organized quantum materials (molecules, color centers, ultra-cold atoms)
- **Area 2:** Engineered quantum properties (novel functionalities with integration in devices)
- **Area 3:** Application of emerging quantum functionalities (building blocks for quantum networks, distributed computing, sensing, simulation)

**SOFOQUIS**

## Enabling Cryo-Quantum Technologies

- Founded in early 2021 in Karlsruhe

### Task:

[...] development, production, worldwide distribution, and consulting of solutions in the field of cryogenics and quantum technologies.”

<https://qinu.de/>

### Vision:

„Paving the way for everyday quantum technologies“
